AUTHORIZATION FOR FLEXIBLE SIGMOIDOSCOPY

1. PROCEDURE AND ALTERNATIVES:

I, _____, (patient or guardian) authorize Dr. _____ to perform the procedure: **Flexible Sigmoidoscopy** -Examination of the lining of the recto-sigmoid colon and the descending colon using a flexible video scope, to a maximum distance of 60cm, and if necessary remove polyps and/or small pieces of tissue (biopsies) for diagnosis.

I understand the reason for the procedure is: _____

Alternatives include: Barium enema, Surgery _____

2. RISKS: This authorization is given with the understanding that any procedure involves some risks and hazards. The more common risks include: Infection, bleeding, abdominal pain, perforation of the intestines, nerve injury, blood clots, heart attack, allergic reactions, and pneumonia. These risks can be serious and may require surgery or possibly be fatal. Estimated perforation rate is 1:2,000 for 60cm, which usually requires surgery.

3. ADDITIONAL PROCEDURES: If my physician discovers a different, unsuspected condition at the time of the procedure, I authorize him/her to perform such treatment, as he/she deems necessary.

4. ANESTHESIA: I understand that, subject to medical criteria and availability, I may choose to receive anesthesia through either IV Conscious Sedation/midazolam (Versed)/Fentanyl or General Anesthesia/propofol. My physician has discussed these choices with me and additional information is included on the Anesthesia information sheet, which has been provided to me for review. I understand that either IV Conscious Sedation/midazolam/Fentanyl or General Anesthesia/propofol may carry risks, including but not limited to, dental injuries, pneumonia, heart attack, or other adverse reactions including death.

5. LIMITATIONS OF FLEXIBLE SIGMOIDOSCOPY: Flexible Sigmoidoscopy is a test of the lower portions of the colon, also known as the large intestine. It does not see the entire colon. It can be used as screening tool for colon cancer. Colon cancer, polyps or other lesions may be identified, but may be present in portions of the colon not viewed by this examination. Colon polyps or other lesions may not be seen due to technical factors, such as retained stool or sharp turns in the colon. Because of this, the patient should be aware of these limitations and should maintain a heightened alertness of any continuing or ongoing symptoms and report them to their physician immediately. The patient may wish to discuss other methods of evaluating the colon with their physician. I understand that no guarantee or assurance has been made as to the results of the procedure and it may not diagnose, cure or treat my condition.

6. I understand that no guarantee or assurance has been made as to the results for the procedure and that it *may not cure the condition*.

7. PATIENT'S CONSENT: I have read and fully understand this consent form, and understand I should not sign this form if all items, including my questions, have not been explained or answered to my satisfaction or if I do not understand any of the terms or words in this consent form.

I consent to any endoscopic photographing, as determined by my attending physician, for medical purposes.

IF YOU HAVE ANY QUESTIONS AS TO THE RISKS OR HAZARDS OF THE PROPOSED PROCEDURE OR TREATMENT, OR ANY QUESTIONS CONCERNING THE PROPOSED PROCEDURE OR TREATMENT, ASK YOUR PHYSICIAN BEFORE SIGNING THIS CONSENT FORM.

This is an example of our consent for procedure for informational purposes. You will sign this sheet in the presence of your physician after your questions and concerns have been answered

Advanced Directives

Please Print and Return

Pikes Peak Endoscopy and Surgery Center, LLC requires the following notice be signed by each patient prior to the scheduled procedure in order to be in compliance with the Self-Determination Act (PSDA) and State laws and rules regarding advance directives. Advance directives are statements that indicate the type of medical treatment wanted or not wanted in the event an individual is unable to make those determinations and who is authorized to make those decisions. The advance directives are witnessed prior to serious illness or injury.

In the ambulatory care setting, if a patient should suffer a cardiac or respiratory arrest or other life-threatening situations, the signed consent implies consent for resuscitation and transfer to a higher level of care. Therefore, in accordance with federal and state law, this facility (PPESC) is notifying you it will NOT honor previously signed advanced directives (aka: DNR or Do Not Resuscitate Order) for any patient, however, if you have executed an advance directive in the past you may bring it with you and we will scan it into our system.

If you have questions, please call (719) 632-7101 and follow the appropriate prompts to speak to a scheduler.

I have read and fully understand the information presented in this release form.
